

Usama Javed

Software Engineer

 devbyusama007@gmail.com  0313-4949510  Lahore, Pakistan  USAMA JAVED

PROFILE

Backend-focused software engineer with 3 years of experience building scalable, high-performance applications using MERN stack and microservices architecture. Proven expertise in Node.js/Express/Nest.js with particular strength in API development, message queuing systems, and performance optimization. Passionate about creating efficient, maintainable solutions that drive business impact.

PROFESSIONAL EXPERIENCE

Executive Software Engineer

12/2024 – present

Aerodyne Group 

- Architected and implemented a Redis Pub/Sub messaging system that **processed 1.2M+ messages** daily with **99.9% delivery rate**, reducing cross-service communication failures by **78%** and **improving real-time performance by 35%**.
- Engineered an automated permission management system through database migrations that **reduced manual configuration time by 72%**, integrated 14 distinct role types with 30+ permission levels, and decreased permission-related security incidents by 53% while **eliminating 8 hours of weekly admin overhead**.
- Enhanced API documentation across **15 microservices** by implementing **10+ custom decorators** and **standardizing 150+ endpoints in Swagger**, resulting in **50% faster onboarding for new developers** and reducing integration-related tickets by **35%**.
- Spearheaded the development of a WebSocket microservice **that supported 5,000+ concurrent connections with <100ms** latency, implementing JWT-based authentication that improved security posture by **60%** while enabling 3 new real-time platform features.
- Led test automation initiatives that increased test coverage **from 45% to 85% across 120,000+ lines of code**, reducing **production bugs by 62%** and cutting QA review cycles from **5 days to 2 days**.

Software Engineer

02/2024 – 11/2024

Dubizzle Labs 

- **Automated** car ad posting process on the Dubizzle  platform through our CRM, **slashing ad posting costs by 50%** and **reducing** posting time from **7-8 minutes to 1 minute**.
- Architected a sophisticated preference module that automatically analyzed customer preferences, matched them with inventory, and seamlessly integrated with an email module for targeted marketing. This innovative initiative drove a remarkable **\$1 million USD business growth**.
- Collaborated with the Product Team to formulate strategies for future releases, prioritizing features in the backlog and achieving a **20% reduction** in release cycle time.
- **Communicated** and worked directly with the Dubai-based Dubizzle team to integrate APIs, **improving** data synchronization **efficiency by 40%**.
- Identified and resolved performance bottlenecks in response to a **50% increase in customer load**, employing optimization techniques like caching, indexing, and eager loading.
 - Achieved a **40% reduction in response times**.
 - Conducted detailed analysis to optimize heavy queries, resulting in a **60% improvement** in query efficiency.
 - Restructured APIs to **decrease response times by 50%**.
 - Aligned frontend with API enhancements, culminating in a boost in application speed and responsiveness.

Associate Software Engineer

07/2023 – 02/2024

Dubizzle Labs 

- Collaborated with a cross-functional team to develop a multi-tenant CRM (Carforce) for managing car auctions and client relationships, serving major clients such as OLX, Kaidee, and Dubizzle Cars.

- Engineered an efficient key mapping solution between Carforce and the external system Dubizzle, reducing reliance on external APIs and **boosting performance of dependent modules by 70%**.
- Introduced the Auction module of Dubizzle Cars [↗](#) using Firebase, enhancing real-time functionality and reducing **processing time by 60%**, while ensuring data security through Firebase security rules.

Trainee Software Engineer

07/2022 – 07/2023

Innovaxel

- Developed and maintained robust web applications using the Ruby on Rails and MERN stack (MongoDB, Express.js, React, Node.js), ensuring high performance and responsiveness.
- Engineered RESTful APIs and integrated third-party services using Node.js and Express for seamless communication between multiple systems.
- Implemented user authentication and authorization systems using JWT (JSON Web Tokens) and Firebase Auth, enhancing security for user management.

EDUCATION

Bachelors in Software Engineering (BSSE)

2019 – 2023 | Lahore, Pakistan

Punjab University College of Information and Technology (PUCIT) | **CGPA: 3.5**

SKILLS

- **Backend:** Node.js, Express.js, Nest.js
- **Frontend:** React.js (Hooks, Context API, Redux), HTML5/CSS3, Tailwind CSS, Bootstrap
- **Databases:** MongoDB, SQL/MySQL, Redis, Elastic Search
- **Message Queuing:** RabbitMQ, Redis Pub/Sub, Sidekiq
- **DevOps:** Docker, CI/CD (GitHub Actions), AWS/Heroku, ArgoCD, Azure DevOps
- **Other:** TypeScript, JavaScript, Mongoose, Jest, Firebase, RESTful API development, Swagger, Git/GitHub

PROJECTS

DRONOS - AI-Powered Drone Asset Monitoring Platform [↗](#)

- Contributed in Development of a comprehensive drone-as-a-service solution that transforms traditional asset monitoring through AI-driven automation. The platform processes and analyzes large volumes of drone-captured imagery, enabling predictive maintenance and intelligent insights.
- **Technologies Used:** Typescript, Node.js, Nest.js, MongoDB, Mongoose, RabbitMQ, Microservices, Docker.

Carforce [↗](#)

- Built an multi-tenant CRM system to streamline the management of car inspections, buying and selling of cars, customer interactions, and car auctions.
- **Technologies Used:** Node.js, Express.js, React.js, MySQL, Elastic Search, RESTful APIs, Firebase.

OLX Motors [↗](#)

- Contributed to the development of OLX Motors, a platform dedicated to buying and selling vehicles.
- Implemented features to enhance user experience, facilitate vehicle listings, and streamline the purchasing process.
- **Technologies Used:** Javascript, React.js, Node.js, Express.js, MySQL, RESTful APIs, Docker, AWS.

FlixGenie - Netflix Clone with AI-Based Recommendations [↗](#)

- Developed FlixGenie, an entertainment-focused Netflix clone, featuring user authentication, content browsing, and streaming capabilities.
- Integrated AI-based recommendations to provide personalized content suggestions, enhancing user experience and engagement.
- **Technologies Used:** React.js, Redux, TailwindCSS, Firebase, OpenAI APIs.
